Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The closest prior art to claims 5, 6, 12 and 13 is to Fukuoka, S. (JP 62-223155) which discloses an aryl fluorine-substituted aromatic carboxylates, with the fluorine being positioned in the para position to the carboxyl group, and its only utility is as an intermediate. Since, there is no specific or significant utility for the aryl fluorine-substituted aromatic carboxylates, there would have been no motivation for one of ordinary skill in the art to make the referenced compounds of claims 5, 6, 12 and 13.

The mere fact that reference cites compounds, structurally similar to applicants' claimed compounds, that can be used as intermediates in production of reference's claimed compounds does not provide adequate motivation for one of ordinary skill in art to stop reference's synthesis and investigate intermediate compounds with expectation of arriving at applicants' claimed compounds that have different uses, rendering structural obviousness rejection unsupported. *In re Lahu*, 747 F.2d 703, 223 USPQ 1257 (Fed. Cir. 1984).

Further, with regards to claims 7 and 14, none of the prior art references teach or suggest the phenyl bonded to the carboxyl group having the nitro and methyl substituents.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
